Sharp Innovators

Sturdiness
and ease of use

Operating machines applied in front of the tractor, operated by means of an independent hydraulic tank and equipped with one or more cutting units.

ADVANTAGES

Our pruning machines for dry and green trees are applied in front of the tractor and equipped with one or more cutting units.

Knives are used for pruning in green trees, up to a maximum of \varnothing 2-3 cm.

For dry pruning in trees and up to \varnothing 6-7 cm., it is necessary to use saw discs, easily and quickly interchangeable.
